Date: August 4, 2011

Subject: Airline Travel with the C-series BiPAP AVAPS and S/T

To whom it may concern:

The Respironics C-series BiPAP AVAPS and S/T devices and operating modes identified in the table below are in compliance with commercial airline EMI/RFI requirements.

Respironics has designed and tested the identified REMstar Series devices for compliance with section 21, Category M, RTCA DO-160F EMI/RFI requirements as specified in the Code of Federal Regulations 14 CFR 382 “Nondiscrimination on the Basis of Disability in Air Travel; Final Rule” and FAA Advisory circular AC No: 91-21B.

Respironics devices approved for airline use have airline use operating instructions included in the User Manual and the following symbol on the device label that may be located on the bottom of the device:

![Complies with RTCA/DO-160F section 21, category M]

The devices identified in the Tables below have been tested and comply with section 21, Category M, RTCA DO-160F EMI/RFI requirements in the configurations noted:
Table 1

Operating configuration:
- AC or DC power source
- With heated humidifier
- Without external communication accessories connected
